

## 2015 STREETS RECONSTRUCTION – NORTH AURORA

**Client: Village of North Aurora**

The 2015 Street Program proposed to reconstruct/resurface approximately 8,600 lineal feet of varying functional classification streets at several locations throughout the Village. The purpose of the project was primarily to address issues of aging and failing pavements, and while being rehabilitated, to incorporate new roadway drainage infrastructure and minor vertical alignment changes at select locations to improve their performance.

Rempe-Sharpe provided all Phase II Design (PS&E) and Phase III Construction services for the project including:

- ◆ Topographic surveys, as required.
- ◆ Coordination of pavement cores / borings.
- ◆ Storm sewer design.
- ◆ Pavement structure design.
- ◆ Preparation of complete roadway plans / bid documents – Plans, Specifications, and Estimate.
- ◆ Assist Village with bidding phase.
- ◆ Construction layout/staking and inspection/observation.
- ◆ Pay Estimate Request review.

**Sensitive to Park Proximity Concerns**

**Sensitive to Residential Neighborhood Concerns**

Design Cycle: November 2014 – February 2015  
Construction: May 2015 – October 2015  
Construction Cost: \$1.12 Million
