

TEKNOR-APEX VACUUM DRYER—BROWNSVILLE, TN

3-D Frame Analysis in Seismic Zone

Modular Design Accelerates Project

Prefabrication Enhances Quality Control

Client: EPIC Systems, Inc.

Owner: Teknor-Apex—Palm Corporation

Provided structural engineering services to size steel and design connection details for A/A Tank, glycerin distillation and process towers in expansion of pasteurizer plant within seismic zone.

Rempe-Sharpe provided:

- ◆ Planning
- ◆ Detailed computer analysis
- ◆ Alternatives analysis
- ◆ Value engineering
- ◆ Plans, specifications and estimates
- ◆ Project management
- ◆ Project schedule

Rempe-Sharpe designed a series of tanks, towers, platforms and foundations for expansion of chemical plasticizer plant in Brownsville, Tennessee. All projects spearheaded fast track fabrication and installation during a 10 week shutdown period.

Rempe-Sharpe worked closely with EPIC Systems, Inc. to complete this project on schedule.

Construction Cost: \$1,872,500.00

Completion: September 2012
