

Metra Parking Lot - 2013

Glen Ellyn, Illinois

**3D Rendering of Glen Ellyn
Metra Commuter Parking Lot**

**Completion of the
Metra Commuter Parking Lot**

Client: Village of Glen Ellyn (Grant Funded Through METRA)

The Village of Glen Ellyn was challenged in 2013 to fast track design of a commuter lot that would serve several functions just west of the downtown. Rempe-Sharpe accelerated the project back onto intended schedule by meeting a number of METRA requirements smoothly and seamlessly.

Rempe-Sharpe:

- ◆ Reviewed Village roadway and utility plans and reports
- ◆ Performed topographic and utility surveys
- ◆ Prepared base sheets
- ◆ Performed pavement and watermain analyses and assessment
- ◆ Performed stormwater hydrology/hydraulic assessments
- ◆ Applied Best Management Practices, designing a pervious brick paver parking lot
- ◆ Attended Plan Commission, Board, Staff and public meetings
- ◆ Prepared IEPA permits
- ◆ Prepared preliminary and final plans, specifications and estimates
- ◆ Provided Construction Phase Services
- ◆ Facilitated Grant Administration

State of the art LED lighting, below grade stormwater storage, and aesthetic upgrades enhance multi-use nature to serve commuters, commercial district, church and school campuses.
